

SERVICES AND WORKSHOPS

Ensure asset reliability and trouble-free operations with high-quality global maintenance services

Well-planned preventive maintenance is vital to ensuring reliable, cost-effective operations.

The maritime market landscape is constantly evolving, and as companies continue to expand their global reach they increasingly need support from truly global service and maintenance networks. In addition, there is growing demand for solutions that help them to ensure asset reliability and trouble-free operations in increasingly competitive markets. This means seeking ways to achieve safer and more reliable long-term performance, improved lifecycle cost efficiency and compliance with environmental legislation.

Well-planned preventive maintenance is vital to ensure smooth day-to-day operations and cost effectiveness, while high-quality reactive maintenance reduces unplanned downtime. As a reliable end-to-end OEM service provider with global reach, Wärtsilä can offer both, enabling you to focus on your core business.

KEY BENEFITS

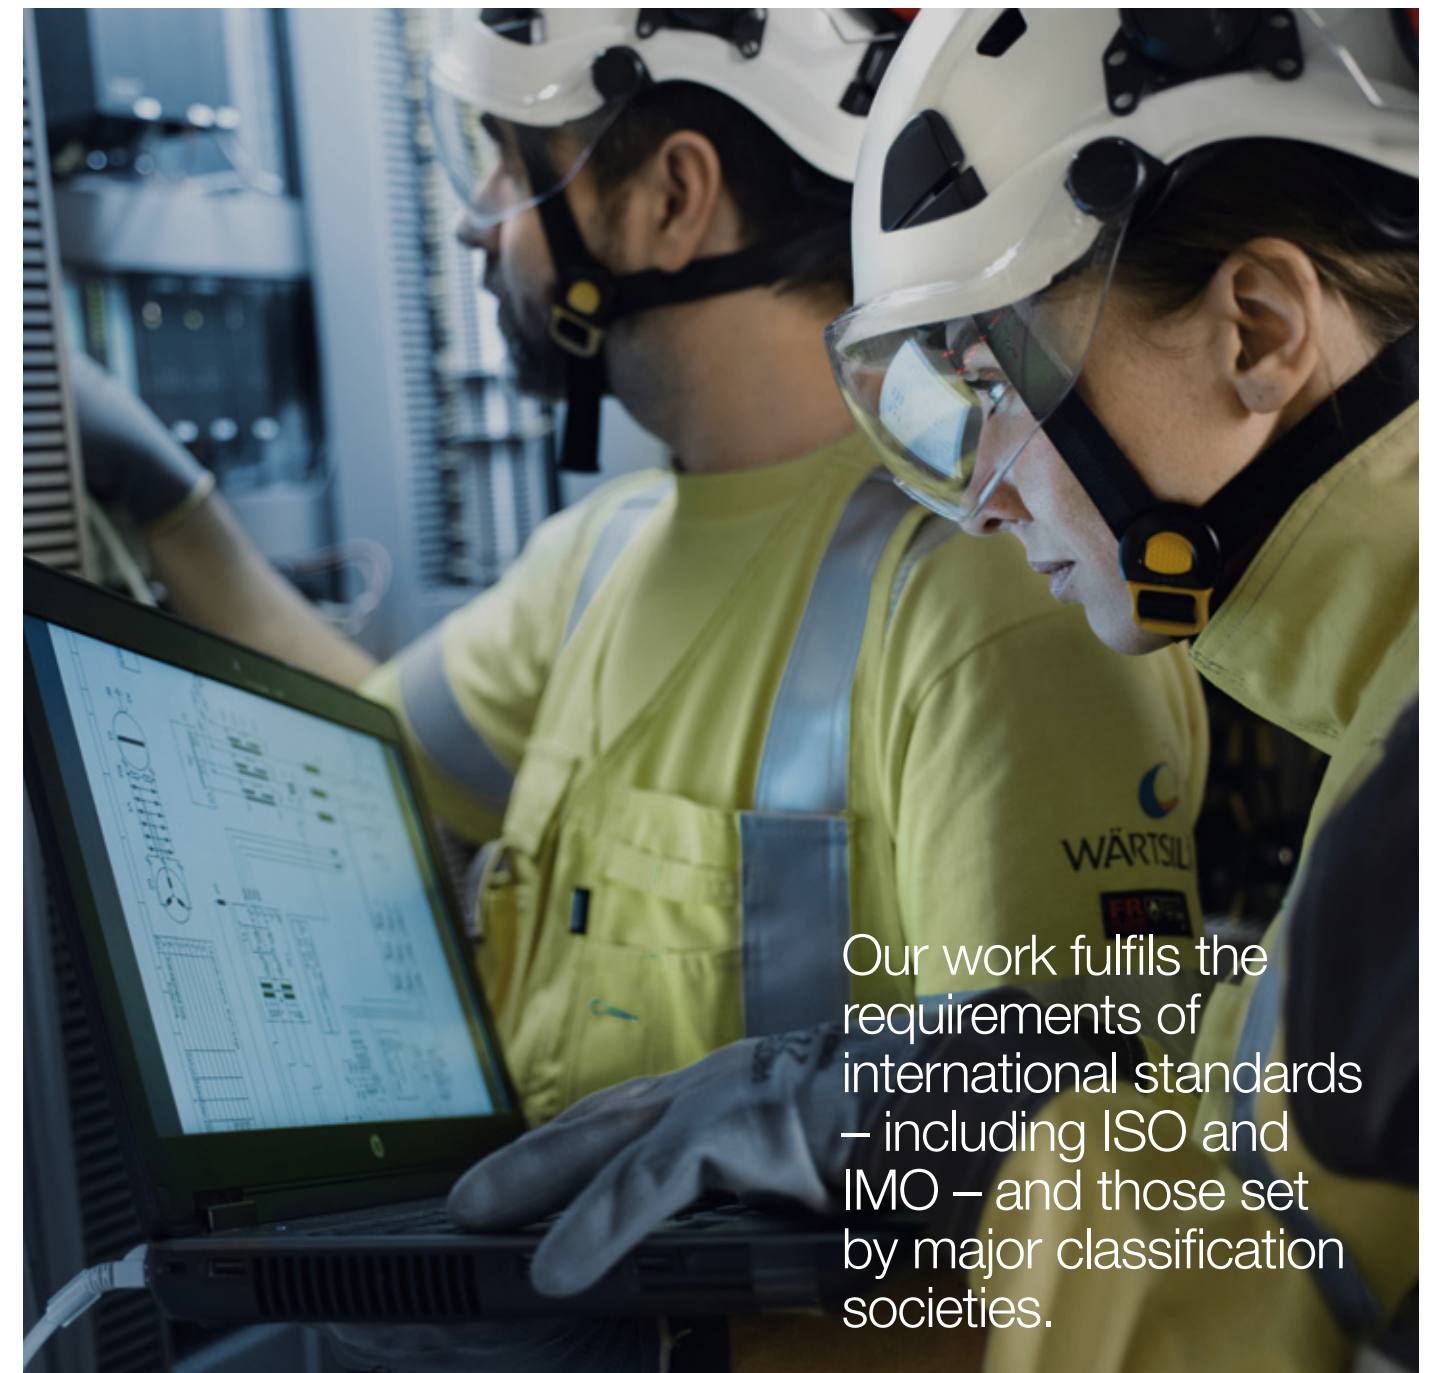

- Ensure asset reliability with timely expert support
- Reduce risk and enjoy peace of mind with high-quality OEM services
- Benefit from global expertise with a local presence
- Access the latest upgrades, technologies and repair methods
- Optimise costs with our one-stop-shop approach

ENSURE ASSET RELIABILITY WITH THE HELP OF OUR FIELD SERVICE EXPERTS

Wärtsilä field service professionals are at your disposal wherever and whenever you need them. We can provide qualified experts with the necessary skills and technical solutions for maintenance, overhaul, repair or troubleshooting services onsite or in local workshops.

Regardless of where the work is being performed, we ensure that it meets the local legislation and the requirements of the relevant international standards, including ISO 9001, ISO 45001 and ISO 14001, International Maritime Organization standards and those set by major classification societies. Safety and quality are our top priorities in everything we do.

Our field service professionals serve you wherever and whenever you need them.

Our work fulfils the requirements of international standards – including ISO and IMO – and those set by major classification societies.

ENSURE OPTIMAL ASSET PERFORMANCE WITH OUR WORKSHOP SERVICES

To ensure high-quality service, Wärtsilä workshops are equipped with modern tools and machinery operated by skilled personnel. Our workshops can handle all types of maintenance and repair work as well as remanufacturing and upgrades or other modifications.

Our service offering covers the full range of equipment including 2-stroke and 4-stroke engines and engine components, propulsion systems, injection equipment, heat exchangers, separators, dampers, governors, pumps, turbochargers and electrical and automation systems.

We also offer a wide variety of exchange components, enabling you to take a reconditioned part on board while your vessel is berthed and return the old part to the nearest reconditioning centre at no extra cost.

Our workshops
can provide repair,
maintenance,
remanufacturing,
upgrade and
modification services
for the full range of
equipment.

RELY ON EXPERT SUPPORT WHEREVER AND WHENEVER YOU NEED IT

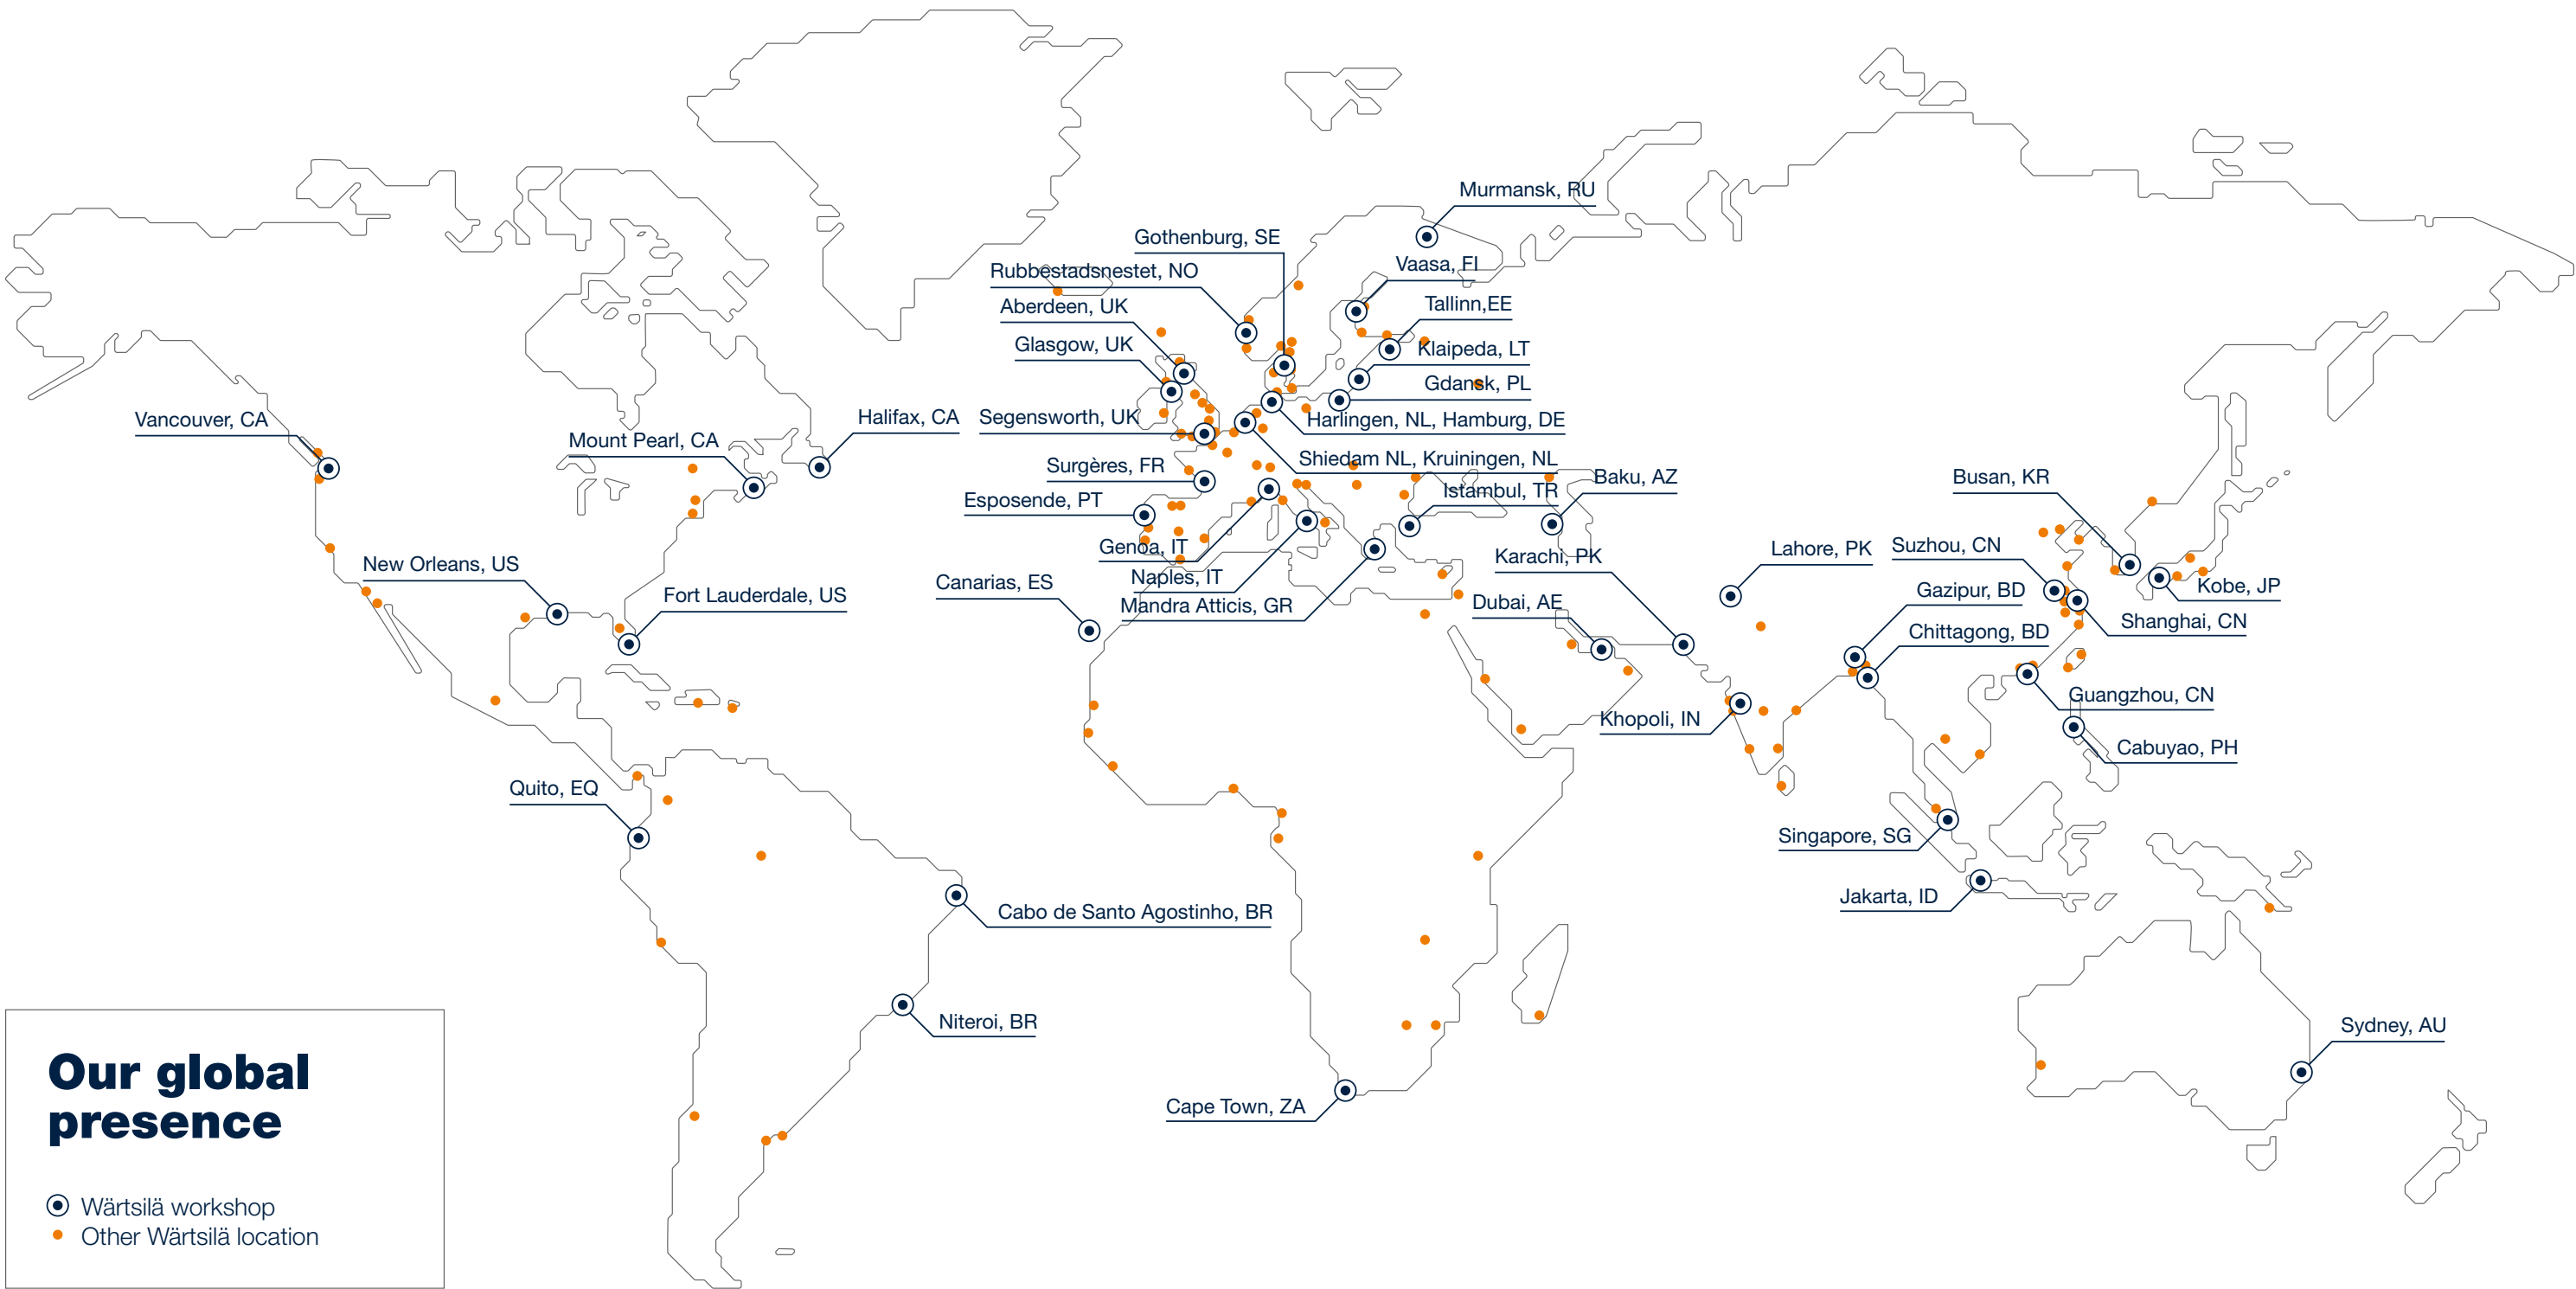

Wärtsilä employs 2,700 Marine Power field services professionals in 70 countries, meaning we can provide you with timely support wherever you need it. Partnering with Wärtsilä for field services gives you access to expert engineering knowledge and certified maintenance and repair methodologies wherever an asset is in the world.

As an OEM service provider we can offer you the latest upgrades, technologies and repair methods as well as greater procurement and contracting flexibility with global quality standards.

Choosing Wärtsilä for field
services gives you access
to our world-class global
engineering knowledge and
certified maintenance and
repair methodologies.

WÄRTSILÄ MARINE POWER EMPLOYS 2,700 FIELD SERVICE PROFESSIONALS IN 70 COUNTRIES

WÄRTSILÄ MARINE POWER IN BRIEF

At Wärtsilä we strive constantly to do what is best for you. This includes optimising the lifecycle value of your installations by offering precisely what you need; a promise we can deliver on since we provide the marine industry's most complete portfolio of products, integrated solutions and global services.

By prioritising operational efficiency, environmental excellence, fuel flexibility and 24/7 support, we work with you to find your shortest route to robust growth, greater profitability and regulatory compliance. This is why today, every third vessel in the world has a Wärtsilä solution onboard.
